

HDT SHELTER FLOORING

Ready Fold, Supa-Trac, Ready Roll, and Cable Management

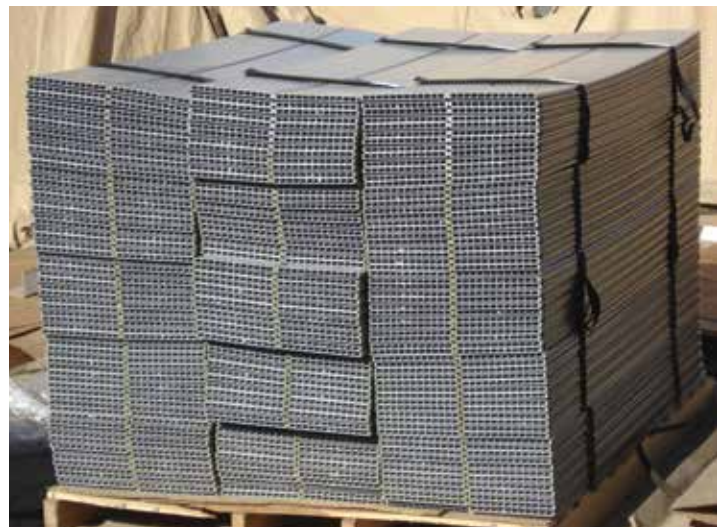

Our Ready Fold Flooring is the only portable flooring system on the market today that is specifically designed for rapid deployment use. It is a high-impact, 0.5" (1.3 cm) and 2" (5.1 cm) thick ABS floor that does not conduct cold or electricity. It is flame resistant and carries a UL94HB rating. With its unique connecting system it can be deployed or broken down rapidly every time with little labor commitment. It is also easy to transport and store.

Ready Fold Flooring is a slat-based flooring systems which packs easily for storage or transport. Flooring units may be arranged in unlimited configurations or shapes and provides a durable flooring solution for expeditionary missions.

Also available, Ready Roll Cable Management for managing power cords or segmenting secure from non-secure network cabling. This flooring accessory provides shelters with clean appearance and reduced trip hazards without the need to hang cables or use tape.

KEY FEATURES

- Man-portable
- 500 PSI load strength
- Solid non-slip surface
- UL94HB flame resistance
- Does not conduct heat, cold or electricity
- Resistant to a broad range of chemicals
- Standard 0.5" (1.3 cm) thick, or optional 2" (5.1 cm) thick
- Available in custom lengths
- High strength extruded ABS

HDT SHELTER FLOORING

Supa-Trac Flooring, Ready Roll Flooring, and Cable Management

SUPA-TRAC FLOORING

Our Supa-Trac flooring is a strong, durable portable floor. The joint provides articulation between panels that allows the surface to conform without bending and breaking panels. The U-shaped ribs provide twice the strength of a normal rib. Supa-Trac has more ribs and more material per square foot than other floors. The panels have aeration slots that allow moisture and air to pass through the surface which minimizes overheating and helps keep turf healthy for a long time. The U-shaped rain channels, while providing drainage on the top surface, create a much larger bearing surface on the bottom. It is extremely fast to install and requires no skills. The product is deployed in sheets - simply lay them next to one another and walk along the seam. No big, awkward rolls to load, unload and handle over and over.

READY ROLL FLOOR, DECON

Made of durable ABS plastic that stays flexible even in cold temperatures. Can be rolled or nested to reduce storage space. Very light at only 1.5 lbs (0.68 kg) per square foot (0.09 m²).

CABLE MANAGEMENT SYSTEM

Designed primarily for use with the Ready Fold Tactical Flooring System. Installs and strikes quickly. Simply fastens to the flooring surface for multi-directional cable access. Developed specifically to facilitate segregation of LAN networks within an installation such as classified from unclassified as well as LAN network cabling from power runs within the complex.
