

Product Description

HDT Shelter Systems are ideally suited to meet the unique mission requirements of first responders, first receivers and emergency managers. Our field proven shelters and accessories offer maximum versatility for multi-mission capabilities. With interchangeable equipment sets, a single shelter can be configured for medical, decontamination, isolation, rest and recovery, emergency operations, or personal hygiene use.

HDT emergency response shelter systems can be customized to provide a complete turn-key system and include modular / scalable expeditionary shelters and a complementary infrastructure including: power generation, heat / ECU's, hygiene equipment, water distribution / storage, medical equipment and work stations.

Utilized by many state and federal agencies and in several international programs, our shelters are recognized around the globe as the most advanced shelter system on the market today. HDT is the single source provider of all major system components, making our systems a completely integrated solution, not just a compilation of parts. All HDT products are built with continued emphasis on rapid deployment, strength, durability, logistics efficiency, cost-effectiveness and minimal personnel requirements.

HDT provides turnkey solutions for the following emergency response systems:

- Emergency Operation Centers
- Medical Surge
- Isolation Ward
- Drive Thru Systems
- Pandemic Flu Immunization
- Decon
- Mobility

Engineered to move with you
