

HW25 VEHICLE HEATER

25,000 BTU/H Vehicle Heater

Tired of experiencing the poor performance and constant headaches associated with commercial-grade vehicle heaters? Upgrade to the HDT HW25. This military-quality vehicle heater offers exceptional product lifecycle performance and easy maintenance in extreme conditions, and is a significant upgrade when compared to commercial grade heaters; especially in the severe duty environments often encountered in expeditionary, exploration, and mining operations.

The HW25 vehicle heater provides safe, reliable heat and may be installed in a vehicle cab, in a vehicle body or in other applications where a hot water source is available. Providing 25,000 BTU's (7.3kW), the HW25 heater operates on 12 or 28 volt DC power and is EMI suppressed to military standards for safe use in many vehicles.

Designed to provide heat for a wide variety of applications, the HW25 series heaters are available in various core tube configurations and the air output location can be configured to meet application-specific needs. Simple to maintain, the HW25 heaters have been in service for many years with thousands of units installed in HUMMV (Hummer®) vehicles. With years of in-service use, the HW25 vehicle heater is the most dependable in-cab heater available.

Contact HDT for more information about the HW25 vehicle heater at 800-969-8527 or visit our website at www.hdtglobal.com.

KEY FEATURES

- 25,000 BTU/H (7.3 kW)
- 12 or 28 volt operation
- EMI suppressed
- All steel case construction
- Field-proven
