

HDT PORTABLE LOAD BANKS

15 kW and 30 kW Versions With Multiple Connector Options

HDT's ruggedized 15 kW and 30 kW portable load banks simulate the electrical loads to power sources such as generator sets that may be encountered in military and heavy industrial applications. The load banks use their energy output to test, support or protect those power sources.

Suitable for different generator set sizes and multiple load inputs from larger generators, the HDT 30 kW portable load bank consists of 10 kW (34,000 BTU/H) and 20 kW (68,000 BTU/H) resistive loads. Loads can be added in stages to achieve 10 kW, 20 kW, or 30 kW (102,000 BTU/H) loads. All stages are circuit-breaker protected.

The HDT 15 kW portable load bank consists of 5 kW (17,000 BTU/H) and 10 kW (34,000 BTU/H) resistive loads. Loads can be added in stages to achieve 5 kW, 10 kW, or 15 kW (51,000 BTU/H) loads. All stages are circuit-breaker protected.

KEY FEATURES

- Load tests generators while in depot
- Prevents wet-stacking for diesel generators
- Auxiliary heat source
- MIL-C 22992 inlet connectors or IEC60309 connectors or terminal block for a hard wired connection
- High temperature shut-off
- Unused connectors are de-energized to prevent accidental shock
- Standard finishes are CARC 383 Green or 686 Tan
