60" INTERACTIVE COMMAND TABLE

Capture Instantly, Communicate Visually, Collaborate Effortlessly

Ideal for expeditionary environments, the HDT Interactive Command Table's (iCT) rapidly deployable table frame is robust yet light weight, and the acrylic tabletop has a neutral gray diffusion coating that provides contrast enhancement while maintaining uniformity and color rendition.

Enables visual collaboration where everyone can participate, whether they're in the command center or not. Allows your team to capture and share ideas as they occur, so they can respond in real-time.

KEY FEATURES

- BrilliantColor, including a 6-segment color wheel, provides accurate color reproduction
- ECO Mode technology helps extend lamp life and lowers power consumption
- Two (2) VGA inputs and one (1) HDMI input connects you to high-definition sources
- Lightweight portable visual display table allows users to collaborate in a cohesive working environment
- Weighs less than 200 lbs (91 kg)
- Impressive 3000 lumen display
- 60 diagonal inches (152.4 cm), 40" x 52" (101.6 x 132.1 cm) of tabletop space
- Perfect for geospatial intelligence, mapping, route planning, and convoy embarkation
- Integrated collaboration tools enable the user to digitally capture the content from the tabletop to the computer
- Built in tools capture and save data and images
- Works with any operating system and any battle command software (i.e., BCS3, CPOF, BFT, GCCS, AFATDS)
- Set-up in less than 5 minutes
- Read-only USB dongle or CD loads information into the memory of the computer and does not install any information on the hard drive, elevating any user right issues associated with software installs
- Three-button stylus with left and right click with instant access to interactive tools
