

The HDT mobile command and control mRTOC C2 display includes two-projection systems that pack into a single case weighing just over 100 pounds. The display can be setup in front or rear projection to accommodate varying shelter designs.

Available in two different screen sizes, ranging from 102 to 125 inches diagonally, the display systems support standard 4:3 XGA images / videos or modern 16:10 wide screen formats. Two systems configured side-by-side create a large, four-projection C2 display wall for tactical operation centers and other mobile ops.

The mRTOC features adjustable projector booms to accommodate newer projector systems.

Paired with an optional Video Distribution Unit, these two-projector systems can switch between video sources and support two quint-screen images.

KEY FEATURES

- Two-projection system that packs into a single case weighing just over 100 pounds
- Display can be set up for front or rear projection
- Screen sizes offered in 102 and 125-inch diagonals
- Adjustable projector booms that facilitate equipment replacement
- Can be paired with an optional video distribution unit to allow the two-projector system to switch between video sources and support two quint-screen images
