

FLAT-PACK RIGID WALL SHELTERS

Military-Grade, Fully Integrated, Any Size, Relocatable Shelters

The Flat-Pack Rigid Wall Shelters provide a military grade temporary facility to perform just about any operation. Our technology uses highly engineered composite wall technology along with a unique light weight structural frame provides endless shelter size combinations. You are no longer limited to the maximum 8' x 8' (2.4 x 2.4 m) profile due to road transportation limits. All you need is a semi flat, firm surface (no slab or foundation).

Our rigid wall shelters come complete with all power distribution and HVAC equipment included. All that is required is a few standard tools and with a few people even the largest shelters can be set up in just a couple days. Transportation can be performed by a standard dry freight trailer or the system can break down into an ISO container for storage and shipping.

KEY FEATURES

- Highly mobile operation, training, and simulation space that can go anywhere you need it
- Engineered light weight composite panel technology providing
 - R10 thermal
 - Superior structural strength
 - No corrosion
- Easily adjusted to any size needed (not just ISO sizes)
- Meets extreme environment requirements (rain, ice, snow, temperature)
- Fully integrated including, lighting, power distribution, and HVAC/ECU
- No foundation or slab required
- Designed to fit together easily using rugged connectors and a few tools

FLAT-PACK RIGID WALL SHELTERS

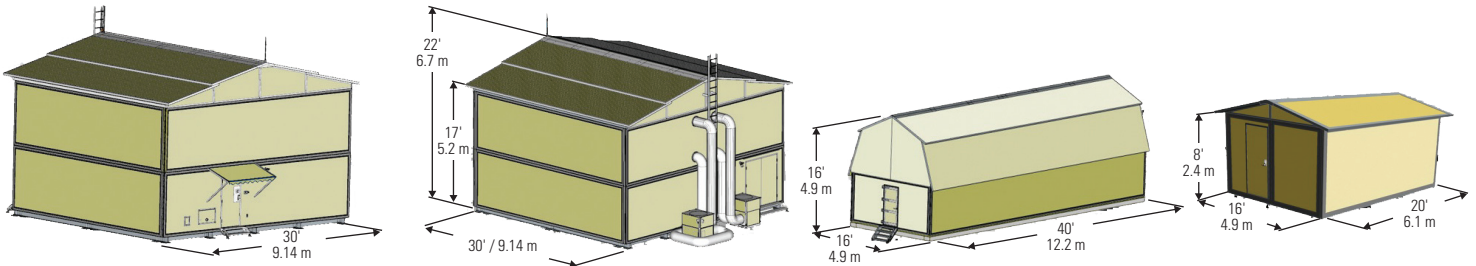

Military-Grade, Fully Integrated, Any Size, Relocatable Shelters

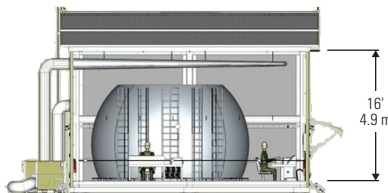

Specifications	
Environmental	Meets MIL-STD-810G thermal and environmental requirements
Shelter Size	
Open interior space	from 8' x 8' x 10' – 30' x 30' x 16' from 2.4 x 2.4 x 3 m – 9.1 x 9.1 4.9 m
Thermal Valve	R10
Fire Compliance	ASTM E84 Grade A fire compliant
Floor Loading	250 lb/ft ² uniformly distributed and 175 psi localized
Power Distribution	Standard 100A 208Y/120V, 3phase, 60Hz standard Larger sizes and foreign power options are available
Lighting	LED (interior and exterior) lighting and internal convenience outlets included
Security	Passive cypher locks are standard Active security systems are optional
Safety	Fire alarm system and emergency lighting are standard
Storage and Transportation	Fits into standard ISO Containers
