

ROTOLIFT™ DUAL FLAT SCREEN MOBILE LIFT CASE

The ROTOLIFT DUAL case provides a mobile solution for creating an uninterrupted display wall. The innovative case makes transport, use, storage and protection of multiple-screen presentation systems and video walls both practical and cost-effective. Monitors can be utilized as separate displays or combined for a single image using pass-through cabling (displays and processor not included).

EZ-LIFT technology gently lifts one permanently mounted display out of the protective case and allows the screen to be rotated for horizontal viewing. The second display stores in the same case and mounts on the display frame in seconds to allow for vertical viewing in a 1x2 matrix. Multiple cases can be combined to accommodate display needs of all sizes. Two cases provides a 2x2 configuration with a viewing area of approximately 92-100" and larger displays can be created by extending the configuration to 3x2, 4x2 or more.

Whether used during deployment or on post, the ROTOLIFT DUAL provides a video wall in minutes and is perfect for tactical command centers, field training or events.

KEY FEATURES

- Proprietary universal mounting brackets for two flat-screen displays. Bottom display brackets micro-adjust vertically and horizontally for exact alignment.
- Shock-mounted EZ-LIFT mechanism is non-electric for dependability and easy setup/takedown when power is not available
- Latching two-piece lid
- Removable front panel for easy access to second monitor
- Rear access port for electric cables and 15-foot powerstrip with surge protection
- ABS plastic cavity covers conceal the inside of the case when in use
- Four 6" locking casters for smooth transport
- Stabilizers for added protection against tip over
- Connector plates for screen alignment
