

## CAMFIRE MV60 SERIES CONTROL UPGRADE

54519-SV-GRN or 54519-SV-TAN

HDT's MV60CG heater is one of the safest, most versatile, and reliable sources of powered outdoor heat available. Field-proven for over 25 years, the MV60CG delivers 60K BTUs of clean, heated air from outside your tent or enclosure.

The MV60 Control upgrade includes an improved safety control, fuel shut-off solenoid ignition transformer and control panel and offers solid state safety control. The HDT-programmed control directs the heater to enter a post purge period on shut-down cycles, allowing it to cool completely for safe pack-up and storage

The control also has diagnostics lights for flame assurance and fault lockout.

The upgrade pack includes a positive fuel shut-off solenoid to allow the burner to shut down while simultaneously blocking fuel from draining back into the tank and allowing for quicker and surer restarts. The ignition transformer has EMI upgrades and a quick-disconnect terminal for the high-voltage lead to shorten maintenance time.

### AFTERMARKET SUPPORT FOR:

**MV60S-2 Heaters –  
serial numbers up to 11,000**

MV60

# CAMFIRE MV60 SERIES CONTROL UPGRADE

54519-SV-GRN or 54519-SV-TAN

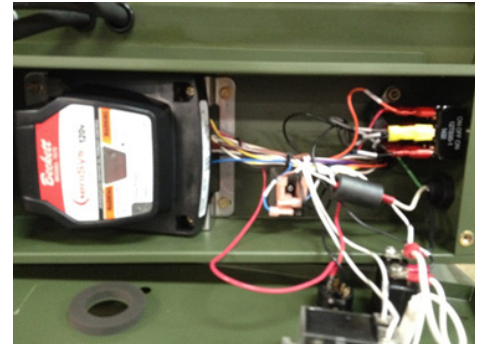

## BENEFITS OF THE MV60 UPGRADE PACK

- Improved safety control
- Post-purge cool down
- Improved ignition transformer
- Positive fuel shut-off
- EMI protection
- Diagnostic LEDs

## COMPONENT LIST OF THE MV60 UPGRADE PACK:

- H003917-S\* Transformer assembly (includes all necessary hardware)
- H008630 Wiring harness, MV60, upgrade kit
- H007086 Solenoid valve assembly
- H004494-003 Ground harness
- H007088 Control box cover
- H008641 Control box
- H007090 Control bracket
- H007076 Combustion control

To find out if your HDT MV60 heater can be updated, please contact your HDT Representative.

*All Camfire® MV60 heaters with serial numbers under 11,000 can be upgraded with the HDT MV60 upgrade pack.*
