

# TRAILER MOUNTED SUPPORT SYSTEM (TMSS) DRASH® MX & J TO AIRBEAM® SHELTER UPGRADE

HDT Global's Trailer Mounted Support Systems (TMSS) combine shelter, utilities, environmental control, power and tactical mobility to form a complete command operation center.

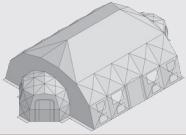

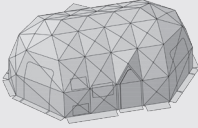

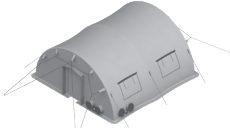

As the original equipment shelters near the end of their lifecycle, HDT is now offering an AirBeam® shelter as a CECOM compliant drop-in replacement for existing TMSS systems (CECOM Memorandum SFAE-CCC-MC dated 4 June 2019). AirBeam shelters comply with I&S standards and meet configuration management form, fit and function requirements.

AirBeam shelters are the most advanced tactical shelters of their kind. Their ease-of-use, rapid deployment and strike-time capabilities and superior strength and durability make them an ideal replacement shelter for the TMSS.

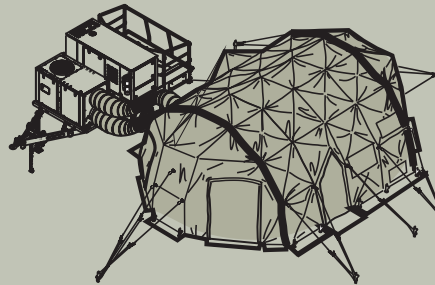

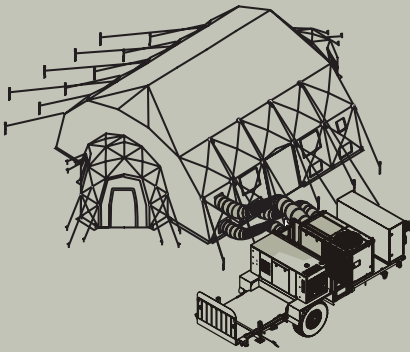

# TRAILER MOUNTED SUPPORT SYSTEM (TMSS) DRASH® MX & J TO AIRBEAM® SHELTER UPGRADE
