

10 MAN ARCTIC SHELTER

A Cold-Weather Shelter for 10 -12 Soldiers

HDT's 10 Man Arctic Shelter is engineered to reduce weight and packed dimensions. It is optimized for ease of deployment without compromising cold weather performance or fire retardancy. The shelter uses a staking template and deploys with a single, adjustable center pole. Tension lines provide lateral support for reduced overall weight and greater ease of set-up and strike. The shelter liner offers comfort and safety. It is engineered to be breathable, wind / waterproof, and prevents condensation build-up on the inside of the shelter. The material used has been tested and approved in extreme cold weather applications and is the same fabric used on the USMC 15 Man Arctic Shelter. The outer cover/fly on the 10 Man Arctic Shelter is constructed with an uncoated fabric, which is durable, fire retardant and rated for extreme cold temperatures without cold cracking.

KEY FEATURES

- CPAI-84 compliant fire retardancy
- Three rows of drying lines for equipment / clothing
- Telescoping center pole to adjust shelter height for changing environmental conditions
- Wind lines engineered for easy deployment and increased load
- Outer cover and liner stove pipe openings
- Provision for legacy family of space heaters and ducted heaters
- The liner fabric provides for more comfortable living conditions with reduced condensation, increased breathability and increased cold weather protection
- Two doors
- Blackout capable
- Adjustable roof vents designed to not impact blackout
- Ease of deployment, 10-15 minutes with three personnel in cold weather gear
- Unparalleled product support
