

HDT BASE-X® MODEL 203 SHELTER

A Multi-Function Mid-Size Shelter

The HDT Base-X Model 203 is a mid-sized shelter with a clear span of 14 feet (4.27 m) and an area of 210 square feet (19.5 m²). The shelter has four entry and egress points and four windows. It is ideal as a command center or for medical, communication, and logistics operations.

Base-X shelters implement a patented folding frame design and a dual-layer system that makes deployment quick and simple. The system is contained in two durable bags easily hand-carried. Package one contains a PVC-coated outer cover attached to the articulating frame, and package two contains the inner liner. The liner includes an integrated floor, electrical wiring harness and air plenum. The system includes the stake kit, wind line kit, mallet and repair kit which fit conveniently into package two.

This dual layer system provides an inherent insulation and an energy efficiency advantage through the thermal barrier created by the enclosed air gap between the outer cover and the inner liner.

Base-X Model 203 Shelter includes stake kit, wind line kit, mallet and repair kit.

KEY FEATURES

- Lightweight, low-cube, man-portable
- Pre-installed floor, electrical wiring and HVAC plenum
- Configurations for US or foreign voltage
- Meets or exceeds all US Military requirements
- No ancillary equipment required for setup or strike
 - Sets up in 6 minutes or less with 2 personnel
